

Network Cabinet

Floor -mounted

General Description

The 19 inch network cabinet is applied to computer network integrated engineering, building wiring, telecommunications, radio and sound engineering, securities, finance, intelligent community, school, government and other economic and large and medium-sized wiring projects. The equipment can be used to place active and passive devices such as switches, routers, servers, 19 inch optical fiber terminal boxes, etc.

Features

- There is fan installed on the top, which can effectively cool down the cabinet and remove dust.
- At the top and bottom, there is an access line to facilitate wiring.
- The front and rear six corners mesh hole door, convenient equipment convection cooling, the heat dissipation ventilation rate achieves 75%, will not cause the equipment because of the heat dissipation problem to affect the normal operation.
- The column is marked with U degrees, convenient for installation of equipment
- The bottom is equipped with casters, which can be rotated at 360 ° to facilitate cabinet movement.

- Security lock device to ensure the safety of the equipment
- Use of high quality cold rolling plate, anti static spraying

Application

Network Cabinet

wall-mounted

General Description

The wall-mounted cabinet is small in size and saves space. It is suitable for small-scale integrated wiring projects such as building wiring, intelligent community, schools and buildings. SOPTO provide 4U,6U,9U,12U,15U and 18U wall mounted network Cabinet.

Features

- The cabinet adopts the international popular color safety tempered glass of the front door, which is elegant and generous;
- The series cabinets are solid in structure, with large load carrying capacity, the maximum static load is 100-200Kg, and the quality is reliable;
- Security lock device to ensure the safety of the equipment
- Use of high quality cold rolling plate, anti static spraying

Application

- Telecommunication subscriber loop
- Fiber to the home(FTTH)
- LAN/WAN
